Summary

I'm a CS engineering student with a strong interest in cybersecurity and AI, always looking for ways to put what I learn into practice through projects and internships. I've been working with Python, Java, and C, and lately I've become really interested in how AI can help tackle challenges in cybersecurity. I'm currently diving into ethical hacking and pentesting, aiming to build skills that will let me contribute to making systems more secure in smarter ways.

Education

B.Tech in Computer Science and Engineering

Manipal Institute of Technology

Expected May 2027

Udupi, India

- Relevant coursework: Algorithms, Automata Theory, Java, C, Data Structures, DBMS

High School Diploma

Our Own High School

Mar 2023

Dubai, UAE

- Subjects: Mathematics, Computer Science, Physics, Chemistry

Experience

Project Intern

CirrusLabs-IND

Jun 2025

Bengaluru, India (Hybrid)

- Used Agile methods for efficient workflow.
- Automated Python tasks, reducing manual work by 30%.
- Collaborated using GitHub for clean version control.
- Applied AI tools to streamline processes.

Key Projects

- **Hospital Management System (JavaFX):** Developed a JavaFX user interface with AI-assisted features in a 5-member team, delivering a functional hospital management prototype.
- **Career Management DBMS (SQL):** Designed a database system to manage tasks and career data, implementing optimized schema and SQL queries for efficiency.

Skills

- Programming: Python, Java, C, SQL
- Tools: GitHub, JavaFX, Agile, VS Code

Certifications

- Google: Play It Safe, Foundations of Cybersecurity, Connect and Protect, Linux and SQL
- DeepLearning.AI: AI For Everyone
- InfoSEC: Introduction to Cybersecurity

Activities

- GenAI Hackathon Participant - Slang Labs (2025)
- App Development Workshop - ISTE, MIT (Feb 2025)
- HackLinux Workshop - ISTE, MIT (2025)
