Summary

I'm a CS engineering student with a strong interest in cybersecurity and AI, always looking for ways to put what I learn into practice through projects and internships. I've been working with Python and C, and lately I've become really interested in how AI can help tackle challenges in cybersecurity. I'm currently diving into ethical hacking and pentesting, aiming to build skills that will let me contribute to making systems more secure in smarter ways.

Education

B.Tech in Computer Science and Engineering

Manipal Institute of Technology

Expected May 2027

Udupi, India

- Relevant coursework: Algorithms, Automata Theory, Java, C, Data Structures, DBMS

High School Diploma

Our Own High School

Mar 2023

Dubai, UAE

- Subjects: Mathematics, Computer Science, Physics, Chemistry

Experience

Project Intern

CirrusLabs-IND

Jun 2025

Bengaluru, India (Hybrid)

- Used Agile practices, automated workflows in Python (30% reduction in manual effort), collaborated via GitHub, and applied AI tools to improve efficiency.

Prism

Ongoing

Information Security Club

Club Member

- Active member of an information security club; continuously developing knowledge in cybersecurity concepts and practices.

Key Projects

- **Career Management DBMS (SQL):** Designed a database system to manage tasks and career data, implementing optimized schema and SQL queries for efficiency.
- **Research Project: Lightweight IDS for Wireless Sensor Networks (Ongoing):** Developing a lightweight IDS for WSNs using Random Forest based anomaly detection and efficient encryption, balancing security, energy efficiency, and scalability.
- **Static Malware Analyzer (Ongoing):** Building a Python-based static malware analyzer for binary inspection, string extraction, and pattern-based threat detection without execution. Designing a modular, efficient system to detect obfuscation and packed artifacts for fast, low-risk malware triage.

Skills

- Programming: Python, C, SQL, Linux Commands
- Tools: GitHub, BurpSuit, VSCode

Certifications

- Google: Play It Safe, Foundations of Cybersecurity, Connect and Protect, Linux and SQL
- DeepLearning.AI: AI For Everyone
- InfoSEC: Introduction to Cybersecurity

Activities

- GenAI Hackathon Participant - Slang Labs (2025)
- App Development Workshop - ISTE, MIT (Feb 2025)
- HackLinux Workshop - ISTE, MIT (2025)
